- UI Frameworks: Tailwind CSS, Chakra UI, Material UI,
- Data & APIs: REST APIs, GraphQL, Axios
- Tools & Platforms: Git, GitHub, Netlify, Postman, Figma, Vercel
- Other: Responsive Design, Cross-Browser Compatibility, Performance OptimizationTools: Git, IntelliJ IDEA, Postman, Jira, Linux

Professional Experience

Mobile App Developer
Webcapz | Port Harcourt, Nigeria
August 2024 – Present

- Curriculum Development: Design and organize course materials, including lesson plans, coding exercises, projects, and assessments that cover the full spectrum of app development. This could range from introductory to advanced topics depending on the student's level.
- Instruction: Teach concepts related to app development, including programming languages (e.g., JavaScript), frameworks (e.g., React Native), and development environments (e.g., Xcode, Android Studio).
- Provide hands-on coding sessions where students can apply what they've learned in real-time. Assist with debugging, optimizing code, and implementing best practices.
- Assessment and Feedback: Evaluate students' progress through assessments, projects, and coding exercises. Provide constructive feedback to help them improve and understand their mistakes.

Mobile App Developer
Nirvanae – Social Media Application | Android & iOS | Remote
February 2025 – September 2025

- Built responsive, high-performance UI using **React Native**
- Integrated **GraphQL APIs** for data querying and mutations (posts, profiles, interactions)
- Implemented social features including **feeds, likes, comments, user profiles, and notifications**
- Collaborated with backend developers and designers to deliver features
- Optimized frontend performance, loading states, and API interactions

- Fixed bugs and handled app crashes
- Developed and maintained the **frontend** of a cross-platform social media mobile application deployed on **Google Play Store** and **Apple App Store**
  Supported production builds and releases to **Play Store** and **App Store**

Frontend Developer
Mogrex | Remote
Match 2025 – August 2025

- Developed a comprehensive dashboard to manage multiple Catholic parishes, parishioners, and their children with the team on the Catholic Parish Dashboard.
- Designed and implemented features to streamline parish management, enhance user experience, and improve data analysis On the Catholic Parish Dashboard.
- Built a support dashboard for various products, providing a centralized platform for issue tracking, resolution, and customer engagement with the team on the Supportaka Dashboard.
- Integrated PayAspire and PinPay payment gateways to enable seamless airtime and data purchases with the team.
- Worked on the Catholic Pay dashboard, a companion platform for the existing Catholic Pay mobile app (available on Play Store and Apple Store) with the team.
- Ensured the dashboard provides actionable insights and efficient management capabilities for Catholic Pay administrators

Mobile App Developer
SAULTECH | Lagos, Nigeria
Match 2025 – December 2025

- Designed and implemented mobile app UI using **React Native**
- Converted UI/UX designs (Figma) into responsive mobile screens.
- Integrated **backend APIs** for data fetching and submission.
- Set up **state management** using Redux / Context API
- Handled **navigation and screen transitions**
- Collaborated with designers and backend developers
- Optimized app performance and load time
- Fixed bugs and handled app crashes

Frontend Developer
Edge Consult (Real Estate)
| Remote, Nigeria
July 2024 – December 2024

- Designed and implemented a fully responsive real estate website using HTML, CSS, and JavaScript, improving mobile and desktop user experiences by 50%.
- Developed intuitive UI/UX components, increasing visitor engagement by 30% through enhanced navigation and interactive property display features.
- Optimized website performance to achieve a 95+ Google Lighthouse score, ensuring fast load times and seamless browsing.
- Deployed the platform on Netlify, achieving 100% uptime and integrating advanced analytics tools to track user behavior.

Software Developer Intern
River State ICT
Department | Port
Harcourt, Nigeria
Match 2023 – August 2023

- Designed and implemented responsive web components using HTML, CSS, JavaScript, and React, achieving a 20% boost in user interface performance.
- Identified and resolved over 15 critical bugs during the internship period, ensuring optimal software functionality.

- Collaborated with senior developers and team members on project requirements, contributing to the successful deployment of 3 key software applications.

Education

- *Michael Okpara University of Agriculture | Abia State, Nigeria*
  B.Eng. Computer Engineering | *2017 – 2022*
- DevCareer
  Frontend Development Certification - January 2022 –June 2023
